# BRITE

## HEAVY DUTY LIQUID MACHINE WASH

**COMPOSITION:** **BRITE** is an aqueous solution of alkalinity builders, corrosion inhibitors, chelates and scale inhibitors in a heavy-duty liquid formulation designed to remove food soils quickly and effectively.

**BENEFITS:** Highly concentrated cleaner.  
No clogging of detergent feed lines as experienced with powder drum feeders.  
Non-foaming.  
Effectively removes eggs, grease, coffee stains. Food stains and other soils.  
Leaves china, glassware and flatware as bright and clean as new.

**NOTE:** Wash temperature is important for sanitary and cleanliness reasons in all machine dishwasher operations. Generally, wash temperatures should be 140<sup>0</sup>F and higher with rinse temperatures above 180<sup>0</sup>F.

**DIRECTIONS FOR USE:**

**MACHINES WITH AUTOMATIC INJECTOR SYSTEM:**

Because **BRITE** is so highly concentrated, the electronic sensitivity control will require adjustment to create the maximum savings.

- 1) Clean machine each day to remove food debris. Ensure wash jets are clear of debris and scale.
- 2) Fill wash tanks with clear hot water (140-160<sup>0</sup>F). Turn on hot water.
- 3) Switch on automatic detergent feeder.
- 4) Wash dishes in normal way.
- 5) Check supply container of **BRITE** regularly to assure an adequate supply at all times.

**MACHINES WITHOUT AUTOMATIC INJECTOR SYSTEMS:**

Steps 1) and 2) as above.

- 3) Add 2-3 ozs. Of **BRITE** for each 10 gallon of water in the machine (Average machine holds 20-30 gallons)
- 4) Operate machine through one cycle without dishes to mix thoroughly.
- 5) Wash dishes in normal manner.
- 6) After each hour of operation add an additional ounce of **BRITE** for each 10 gallons of water in the tank.
- 7) For improved polish on crockery and glasses, use **GLISTEN**.

**SPECIFICATIONS:**

|                  |   |                                       |
|------------------|---|---------------------------------------|
| Appearance       | - | Water white mobile liquid             |
| Odour            | - | Odourless                             |
| Specific Gravity | - | 1.25                                  |
| pH               | - | 14.0 Concentrate, 12.7 1% Solution    |
| Safety           | - | Completely safe when used as directed |

**CAUTION:** **BRITE** contains **Sodium Hydroxide**, which is a corrosive substance. Excessive skin contact should be avoided. For splashes on skin, eyes or clothing flush with water.

***BEST-CHEM LTD. IS AN ISO 9002 REGISTERED FIRM.***
