

TECHNICAL DATA SHEET

MIGHTY - MO

COMPOSITION: **MIGHTY-MO** is a blend of alkaline phosphate builders, biodegradable non-ionic surface-active agents, and phosphate ester penetrating detergents and solubilising agents.

BENEFITS: **MIGHTY-MO** is a general purpose liquid concentrate exclusively based on phosphate alkalis to provide an ultra-safe cleaner for food industry outlets where "harsh" alkalis such as caustic soda, caustic silicates, etc. are unacceptable.

MIGHTY-MO has controlled foaming action and is highly suitable for cleaning processes using hot and cold water pressure cleaning machines.

MIGHTY-MO is non-flammable, non-corrosive and completely safe in use. Will not attack normal construction metals.

MIGHTY-MO is safe to use in all makes of pressure cleaning machines and contains scale inhibitors to reduce frequency of de-scaling operations.

MIGHTY-MO is versatile and may be used in Garages, abattoirs, Farms, Poultry Houses, Egg Washing, Milk Processing Plants, Food Factories, Food Machinery Manufacturers, etc.

DIRECTIONS FOR USE:

CAR AND VEHICLE WASHING: Using cold pressure washing equipment, dilute 1 part **MIGHTY-MO** with 20 parts water in detergent container. Pre-wet car with water then clean with **MIGHTY-MO**. Flush with water.

ENGINE & CHASSIS CLEANING: Very heavily oiled/greased chassis should be pre-sprayed with emulsifiable solvent such as **ZIP** prior to application of **MIGHTY-MO**. Dilute 1:10 with water in detergent container in hot or cold pressure washer. **MIGHTY-MO** will not leave white caustic deposits.

FOOD PROCESSING PLANT: For hand cleaning, dilute **MIGHTY-MO** 1:40 parts hot water, apply by swab or scrubber. Rinse thoroughly after cleaning. When using pressure-washing equipment, dilute 1 part **MIGHTY-MO** with 20 parts water in detergent container, clean and rinse with cold water.

POULTRY PROCESSING PLANTS, HATCHERIES, CAGES, EGG WASHING PLANTS: Use dilutions as above. **MIGHTY-MO** leaves no alkaline residue and is virtually odourless.

SPECIFICATIONS: Appearance	-	Clear, pale pink foaming liquid
Odour	-	None
Specific Gravity	-	1.05
pH	-	11.5 (Concentrate) 10 (Solution)
Safety	-	Completely safe when used as directed

CAUTION: For splashes, wash liberally with cold water.

BEST-CHEM LTD. IS AN ISO 9002 REGISTERED FIRM.
