

# TECHNICAL DATA SHEET

## MIRACLE MAN

**COMPOSITION:** **MIRACLE MAN** is a blend of Hydrocarbon solvents and low toxicity Chlorinated solvents with added lubricants and anti-corrosion additives.

**BENEFITS:** Highly effective penetrating fluid with non-corrosive solvents.  
Contains Transformer oil to lubricate switchgear.  
Additives give exceptional water displacing properties leaving a moisture repellent film which never dries. Starts "wet" engines. Ideal to waterproof ignition systems.  
Contains no "highly inflammable solvents" such as Acetone and M.E.K.  
Chlorinated solvent gives additional benefit of excellent cleaning power removing surplus oil and grease, facilitating penetrant action.  
Safe to use on all normal construction metals, and many plastics including polypropylene, nylon, bakerlite, U/F resin.(Not recommended for acrylics and polystyrene).

**DIRECTIONS FOR USE:** **BY SPRAY:** Apply **MIRACLE MAN** as supplied by low pressure spray. (non-atomising). When de-waterring, ensure the surface is thoroughly wetted and running off to carry the water globules away.  
**DIP TANK APPLICATION:** Using a metal tank with lid and water drain off valve at base, immerse parts for up to 10 minutes to act as both a dewatering agent and penetrant.To prolong the bath life when used for dewatering, ensure that the displaced water is drawn off the tank weekly.

**SPECIFICATIONS:**

Appearance	-	Clear red liquid
Odour	-	characteristic odour
Specific Gravity	-	1.0
Safety	-	Eye and hand protection are recommended

**CAUTION:** **KEEP AWAY FROM NAKED FLAMES.**  
Use in well ventilated areas.  
Contains Petroleum Distillates.  
Must not be taken internally.

***BEST-CHEM LTD. IS AN ISO 9002 REGISTERED FIRM.***
