

TECHNICAL DATA SHEET

S.O.S.

SAFEFORM OIL SLICK REMOVER

COMPOSITION: S.O.S is a highly efficient, ready to use, low toxicity oil emulsifier. Based on a low aromatic hydrocarbon solvent and low toxicity biodegradable emulsifying agents.

BENEFITS: Highly efficient emulsifier for heavy and light oils.
Virtually non-toxic, safer than conventional emulsifiable solvents.
Safe to use with High Flash Point (above 70⁰C)
Pleasant to use, low odour. No complaints about paraffin or diesel smell.
Suitable for harbour boards, oil refineries, power stations, local authorities, fire stations, etc.
Stable to temperatures of -10⁰C; store for indefinite periods in steel drums.

DIRECTIONS FOR USE:

OIL ON LAND: Spray S.O.S. as supplied using a low pressure **SPRAYER** with a coarse spray pattern. Allow to soak into oil and grease, agitate where necessary, and hose away with a high-pressure hose.

OIL ON WATER: Spray S.O.S. as supplied onto oil slick and vigorously agitate the treated oil to ensure its complete dispersion. For small spills in confined areas, a high-pressure fire hose may be sufficient.

NOTE: It is advisable to consult Local Water Authorities prior to using S.O.S.

SPECIFICATIONS:

Appearance	-	Clear pale amber liquid
Odour	-	Very slight
Specific Gravity	-	0.82 - 0.83
pH	-	Neutral emulsion formed in water
Safety	-	Safe when used as directed. Not toxic to human beings.

BEST-CHEM LTD. IS AN ISO 9000 REGISTERED FIRM.
