

TECHNICAL DATA SHEET

STEAM CLEANER CONCENTRATE

COMPOSITION: **STEAM CLEANER CONCENTRATE** is a heavy duty concentrate for all hot and cold pressure washing machines based on a blend of caustic alkalis, phosphates, scale inhibiting sequestering agents and biodegradable wetting agents.

BENEFITS: **STEAM CLEANER CONCENTRATE** is the product for those "impossible" dirty jobs in heavy industry to remove build-up of grease, oil, dirt and old flaking paint.

Rapidly penetrates oil and grease bound dirt.

Based on biodegradable synthetic detergents.

Economical in use, supplied as liquid form for safety and convenience.

Excellent for pre M.O.T. chassis cleaning. Will not remove sound black chassis paint.

Essentially odourless in use, contains no paraffin or inflammable solvents.

Will not affect plastics, glass, and wood, steel, copper, brass, and concrete.

Slight attack on aluminium and galvanised steel although normally

acceptable.

Contains scale inhibitors to reduce the tendency for steam cleaner coils to scale up in hard water conditions.

**DIRECTIONS
FOR USE:**

before using **STEAM CLEANER CONCENTRATE** it is strongly recommended that the machine is thoroughly descaled with **RUST-SCALE** to ensure efficient heat transfer in steam coils and optimum pressure output.

HEAVY DUTY CLEANING: Dilute 1 part **STEAM CLEANER CONCENTRATE** with 10 parts water in machine detergent container and adjust detergent control accordingly. Rinse well with clear water after use.

GENERAL CLEANING: Dilute 1 part **STEAM CLEANER CONCENTRATE** with 20 parts water and use as above.

NOTE: **STEAM CLEANER CONCENTRATE** is a powerful alkaline cleaner and although it will not affect sound stoved paintwork, it is not recommended for use on cars and vehicles finished with coach paint and transfers. It should never be used for dewaxing new cars.

SPECIFICATIONS: Appearance	-	Clear yellow foaming liquid
Odour	-	Slight detergent
Specific Gravity	-	1.1
pH	-	13.5 (concentrated) 12.5 (solution)
Safety	-	Safe when used as directed

CAUTION:

PRODUCT IS AN ALKALINE LIQUID.

Avoid excessive skin contact.

In case of contact, flush skin or eyes with plenty of cold water.

BEST-CHEM LTD. IS AN ISO 9002 REGISTERED FIRM.
