

TECHNICAL DATA SHEET

WEEDKILLER

COMPOSITION:	Sodium Chlorate 40%ww Aqueous Solution UN 1908	
BENEFITS:	<ul style="list-style-type: none">*Soluble product, easy to use. No need for mixers or agitation in spray tank whilst using.*Rapidly kills all established vegetation.*Acts both through the foliage and the roots.*Persistent for three months to a season depending on soil conditions.*Particularly effective in killing and preventing regrowth of perennial broad-leaved weeds and generally effective on many species of perennial grasses.*Kills problem weeds which are often resistant to residual chemicals e.g. field bindweed, coltsfoot, stinging nettle, and creeping thistle.*Does not contain Parquet.	
DIRECTIONS FOR USE:	Apply at any time during the growing season. Best results will be obtained from an application in spring or early summer. Do not apply before heavy rain. Wear waterproof coat and rubber boots when applying, avoid working in weedkiller spray mist.	
DILUTION RATES:	Add 500 ml of product to 9 litres of water. Use over 10 sq. metres.	
SPECIFICATIONS:	Appearance	Clear colourless liquid
	Odour	None
	Specific Gravity	Approx. 1.1
	Safety	See below
PRECAUTIONS:	FIRE RISK - Personal clothing, paper, timber, and plant debris may become highly inflammable if contaminated with Sodium Chlorate. Wash solution from skin and eyes immediately Wash hands before meals and after work Do not contaminate ponds, waterways with product Do not apply near cultivated plants or trees or on slopes where run-off to cultivated plants may occur. Keep livestock out of treated areas for at least two weeks if poisonous weeds such as ragwort are present.
