# X-FLOW

## LIQUID BACTERIA DRAIN MAINTAINER

**COMPOSITION:** X-FLOW is a state of the art bioremediation solution. designed specifically for X-Ray lab, MRI, Cat scan and X-ray processor drain systems. X-FLOW rapidly penetrates, digests and liquifies fats, oils, greases, cellulose, proteins and starches that collect in and slow or block the flow of a system, interceptors or drain lines. X-FLOW is a natural bioenzymatic solution that has been scientifically formulated to withstand the harsh chemical environment of MRI, Cat Scan and X-Ray processor drains.

**BENEFITS:** Automatic and maintenance free when used with the pump dispenser. Will not deteriorate pipes, contains no caustics, acids or solvents. Converts grease into harmless carbon dioxide and water, in most cases reducing or eliminating costly waste surcharges. Pathogen free, non -toxic. Reduces and often eliminates odours. Reduces "downtime" caused by slow or blocked drains. Reduces drain cleaning and the likelihood of employee contact with hazardous compounds or blood and body tissue that may be infected.

**SPECIFICATIONS:**

Appearance	-	White opaque liquid.
Odour	-	No characteristic odour.
Volatile by Vol.(%)	-	95
Solubility Description	-	Disperses.
Safety	-	See below

**PRECAUTIONS:** Always wear protective clothing including goggles, rubber gloves and apron if splashing is likely to occur.

***BEST-CHEM LTD. IS AN ISO 9002 REGISTERED FIRM.***
